Galvanised Tube For Stacking Racks – 1050 mm

Steel stacking tube for rental with a length of 1050 mm. This tube is suitable for post pallet stacking racks such as mobile racks and Big Bag racks. Thanks to the tubes, the racks can be easily stacked.

Category: Stacking Racks, Pallet Racks,

Product description

Galvanised Tube For Stacking Racks – 1050 mm – rent

Steel stacking tube for rental with a length of 1050 mm. This tube is suitable for post pallet stacking racks such as mobile racks and Big Bag racks. Thanks to the tubes, the racks can be easily stacked. Depending on the length of the tubes, the required space can be achieved. Stacked racks save space and costs in storage. The galvanised tubes are scratch resistant, sturdy and rust-resistant. The diameter of the tube is 60.3 mms, the wall thickness is 2.9 mms and its own weight is 4.57 kg.

When stacking the mobile racks, please note that the gap between the two racks is the length of the tube, minus 8 centimeters. This space is created by the tube sinking slightly into the rack that is on the ground. The rack that is stacked on top of it slides slightly over the tube.
