Isothermal Distribution Container - 400x300x300mm

Isothermal distribution container for pharmaceutical products whose transportation requires maintaining appropriate temperatures. RFID sensor allows tracking of transport and storage conditions.

Category: Plastic Boxes, Distribution boxes,

Product description

Isothermal Distribution Box for Rent - 400x300x300mm

Isothermal plastic distribution container for transporting products requiring specific transport conditions. Capacity 8,5 l. Depending on the number of cooling inserts, it is possible to maintain two temperature ranges: 2-8 deg C or 15-25 deg C, for up to 36 hours. The plastic container is equipped with a special insert, providing temperature insulation. The use of an additional sensor, makes it possible to track the temperature and any shocks during transport.

Maximum tightness, track&trace with RFID reader

Thanks to its robust design, the container provides maximum airtightness and insulation from external conditions. Special holes in the integrated lids provide the possibility of sealing the isothermal container for transport. The integrated RFID code label gives full traceability of each container by special readers.

Hygienic, clean and safe

This highly hygienic and isothermal transport container is a great solution for the medical and pharmaceutical industries. Ideally suitable for transporting medicines, pharmaceutical products and anywhere where it is required to maintain proper temperatures during transport. Used in hospitals, nursing homes and pharmaceutical companies. The container is designed for an automatic cleaning process after each use.

Specification

Outside dimension length (mm)	400
Outside dimension width (mm)	300
Outside dimension height (mm)	300
Inside dimension length	230
Inside dimension width (mm)	170
Inside dimension height (mm)	220
Material	Plastic
Carry weight (kg)	2
