Product description

Metal Wire Pallet Cage Container - 1200x1000x1000 mm - Collapsible- rent

This metal wire container for rental has exterior dimensions of 1200x1000x1000 mm and interior dimensions are 1126x969x872 mm. The strong wire container has a carrying capacity of up to 500 kg. The metal of the container is electrolytically galvanized and as a result the container is protected from moisture and bad weather. The mesh container is stackable and collapsible and the folded height is 360 mm. 9 folded wire containers can be stacked on a 3240 mm pile and because the metal mesh container is collapsible and stackable, a lot of space can be saved during return transport or storage. The wire pallet cage container is equipped with 1 folding window on the long side and has its own weight of 50 kg.

These wire containers are widely used for use in the automotive industry, mussel farms and for the storage of, for example, production waste or parts for the manufacture of cars.
