A large nested container with risers, used most often in removals. Ideal for transporting computer and electronic equipment. Can be equipped with a special anti-static mat.

**Category:** Plastic Boxes, Nesting boxes,

### **Product description**

## **Plastic nesting container with risers 800x600x235mm for rent**

High quality plastic container for transporting goods. Capacity of 60L. Made of durable plastic offers a considerable amount of space. Special places for labels located on the shorter sides

### **Nested design, additional metal risers**

The nested design of the plastic container allows stacking when the container is empty. Thanks to additional metal arches, it is also possible to stack the containers on top of each other - piledriving - even when they are full of goods. Thanks to extendable arches and special ribbing in the base, the container placed on top stabilizes in the exact position. By

folding down the risers, empty containers can be nested to save storage space

## **Ideal for transporting computer equipment during a move**

This large plastic container is great for moving offices, libraries, warehouses or schools to transport: computer monitors, laptops and other computer equipment. Special anti-static mats or cardboard dividers can be additionally installed on the bottom of the container, as well as between the transported items, providing greater safety for the transported electronic equipment.
