Prestar metal roll container for rental with exterior dimensions of 1100x800x1700 mm and interior dimensions of 1040x770x1460 mm.

Category: Roll Containers, 3 Sided Roll Containers,

Product description

Prestar Folding Roll Container with Plastic Base - 1100x800x1700 mm - rental

Prestar metal roll container for rental with exterior dimensions of 1100x800x1700 mm and interior dimensions of 1040x770x1460 mm. The worktainer is equipped with a plastic base and a steel tube at the front of the roll container. The side gates can be attached to each other by this tube for extra stability. This makes the construction stronger than other 3 sided roll containers that are only equipped with roll container binders. Moreover, it is safer because one does not run the risk of a binder being released during use.

The load capacity of the Prestar worktainer is 500 kg and its own weight is 53 kg. The roll container is collapsible in an L-shape and can be nested with other roll containers of this type. This makes the container space-saving during return transport or when not in use. This Prestar roll container is equipped with four low-noise swivel wheels (two of which are braked).

Specification

Outside dimension length (mm)	1100
Outside dimension width (mm)	800
Outside dimension height (mm)	1700
Inside dimension height (mm)	1460
Carry weight (kg)	500
