Category: Roll Containers, 3 Sided Roll Containers,

Product description

Prestar Folding Roll Container with Plastic Base - 800x600x1700 mm - rental

Prestar metal roll container for rental with exterior dimensions of 800x600x1700 mm and interior dimensions of 740x570x1460 mm. The worktainer is equipped with a plastic base with dimensions of 800x600 mm. The load capacity of the Prestar worktainer is 500 kg and its own weight is 42 kg. The roll container is collapsible in L-shape and can be nested with other roll containers of this type. This makes the container space-saving during return transport or when not in use. This Prestar roll container is equipped with four low-noise swivel wheels (two of which are braked – and therefore suitable for temporary internal transport in hotels, hospitals and nursing homes).

The roll container is equipped with a steel tube at the front of the roll container. The side gates can be attached to each other by this tube for extra stability. This makes the construction stronger than other 3 sided roll containers.

Specification

Outside dimension length (mm)	800
Outside dimension width (mm)	600
Outside dimension height (mm)	1700
Inside dimension height (mm)	1460
Carry weight (kg)	500
